

MUHAMMAD AHMAD IQBAL

Full-Stack Web Developer

+92 318 4405326 | ahmadiqbal1021412@gmail.com | Lahore, Pakistan | [GitHub](#) | [LinkedIn](#)

SUMMARY

Motivated Software Engineering student with hands-on professional experience in full-stack web development using React, Node.js, and REST APIs. Demonstrated ability to ship production-ready, scalable applications with real-world integrations including AI APIs, web scraping, and third-party services. Strong foundations in OOP, Data Structures & Algorithms, and DBMS. Seeking opportunities to contribute to impactful projects while expanding technical expertise in TypeScript and system design.

EXPERIENCE

Jr. Front-End Engineer — Breakout Internet Marketing, MI 2025 – Present

React · PHP · JavaScript · HTML/CSS · SEO Tools

- Delivered pixel-perfect, responsive web interfaces by translating design mockups into cross-browser-compatible UI, reducing revision cycles with clients.
- Integrated front-end components with back-end services and REST APIs, ensuring seamless data flow across the full stack.
- Engineered multiple custom SEO tools in PHP, enabling the marketing team to streamline optimization workflows and measurably improve site performance metrics.

PROJECTS

Chrome Extension – Scraper & Bookmark Manager 2024

JavaScript · Chrome Extension API · Gemini API · HTML · CSS

- Built a full-featured Chrome Extension adopted by 15+ peers that scrapes active tab data and exports structured output to CSV and HTML formats.
- Integrated Gemini API to power AI-driven page summarization and an interactive chat interface directly within the extension popup.
- Implemented WhatsApp-style chat UI, browsing history tracking, custom notes, light/dark mode, and user-configurable settings.

Amazon Product Scraper 2024

Node.js · JavaScript · Web Scraping · CSV Export

- Engineered an automated web scraper to extract product details including pricing, ratings, and metadata from Amazon listing pages.
- Exported structured scraped data into CSV format, enabling efficient offline analysis; applied rate-limiting best practices to ensure reliable data extraction at scale.

Assets Management System 2024

Node.js · Express.js · REST APIs · MySQL

- Developed a backend REST API system for tracking and managing company assets across the full asset lifecycle with full CRUD support.
- Designed a normalized database schema and system architecture to support efficient querying, reducing redundancy and improving data integrity.

EDUCATION

Bachelor of Software Engineering Expected: February 2028

COMSATS University Islamabad, Lahore Campus — Lahore, Pakistan

CGPA: 3.35 / 4.0 (5th Semester)

Web Development Certificate — Peak Solutions Lahore 2023

SKILLS

Languages & Querying: JavaScript (ES6+), TypeScript (learning), Java, HTML5, CSS3

Frameworks & Libraries: React, Node.js, Express.js, REST APIs

Databases & Integrations: MySQL, MongoDB, Gemini API, Chrome Extension API

Core Concepts: OOP, Data Structures & Algorithms, DBMS, MVC Architecture

Tools & Platforms: VS Code, Git, GitHub, Chrome DevTools, Postman, Web Scraping
